Features and Benefits

- Easy 1 minute setup, no tools required
- 70% space saving in storage/transportation mode
- 100% stainless steel
- Working surfaces (shelves and top), front and side panels made of food grade #304 stainless steel
- Three bar top positions allow for joining multiple bars in a long continuous bar, or to setup a single bar flush with a wall
- Available with integrated double-layered ice bin keeping the ice free of water, or with a standard sink
- Amazing 3d holographic lighting effect, remote control of light colors and special effects
- Interior workspace has dimmable white LED light (DELUX-RGB only)
- Green Product: 99.9% made of recyclable materials and low energy consumption LED lighting
- Can be carried through doors, narrow hallways, small elevators and in most cars
- Adjustable legs allow for full stability on uneven floors
- Lighting system remote control support fixed inside the bar for secure storage
- All LED lights: life expectancy of 10,000 hours, low power consumption, can run on a battery
- Only high-end materials and electronic components used
- Includes heavy duty black vinyl protection pouches for main frame and bar top
- Engineered for work efficiency and comfort with optimized dimensions and configuration
- Brushed stainless steel can be repaired and damaged parts can be replaced to extend product's life

Models

- DELUX** Base Model
- DELUX-RGB** Integrated Holographic RGB Lighting System
- DELUX-BIN** Integrated Waterfree Ice Bin
- DELUX-SINK** Integrated Sink (sink only, no faucet)
- DELUX-RGB-BIN** Integrated Waterfree Ice Bin and Holographic RGBW Lighting System
- DELUX-RGB-SINK** Integrated Sink and Holographic RGBW Lighting

Integrated Waterfree Ice Bin

Integrated Sink

Integrated Holographic RGB Lighting

Three Top Positions & Continuous Bars

Three bar top positions allow for multiple configurations. Single bars are normally setup in 'center' position, but can also be setup in 'left' or 'right' position if flush with a wall.

Two bars can be joined together by setting them in 'left' and 'right' positions. In order to join three or more bars, shorter Continuous Bar Tops are required for each central section.

Space Saver & Quick Assembly

DELUX Portable Bars can be disassembled and reassembled in one minute, without tools, allowing for a 70% space saving in storage and/or transportation. It can be carried through smaller doors, narrow hallways, on rooftops and in most standard cars.

1. Remove security lock pins

2. Open both sides of the bar

3. Insert top shelf
(optional: insert sink or ice bin)

4. Insert speed rail

5. Install bar top
(optional: plug in lighting power supply)

Custom Branding Option

DELUX Portable Bar can be branded with logos and letters. We apply laser-cut stainless steel letters on the bar front, for a classy and spectacular look day and night. Letters can also be coated in specific colors.

The holographic lighting effect creates an illusion of light lines curving inside the front panel, behind the logo.

Technical Specifications

Code	Description
DELUX	Base. Includes main frame, bar top, top shelf and speed rail. Comes with black vinyl protection pouches to protect main frame and bar top in transportation and storage.
DELUX-RGB	Base + integrated 3d holographic lighting system, white + RGB, with remote control.
DELUX-BIN	Base + integrated double-layered waterfree ice bin.
DELUX-SINK	Base + integrated sink only, no faucet.
DELUX-RGB-BIN	Base + integrated double-layered waterfree ice bin and 3d holographic lighting system, white + RGB, with remote control.
DELUX-RGB-SINK	Base + integrated sink only (no faucet) and 3d holographic lighting system, white + RGB, with remote control.

Dimensions and Weight

Total Assembled Weight	116 lbs (53 kg)
Storage Space (L x W x H)	38" x 9" x 46"

Shipping

Box Dimensions (L x W x H)	41" x 13" x 52"
Total Packaged Weight	146 lbs

Continuous Bar Length

2 Bars (Left - Right)	92"
3 Bars (Left - C - Right)	130"
4 Bars (Left - C - C - Right)	168"
Each additional bar	add 38"

Lighting System

All LED lights: life expectancy of 10,000 hours, low power consumption, can run on a battery. Front lighting is RGBW, integrated in bar top. Dimmer, color and transition effects controlled with remote. Workspace lighting is white only and controlled by a manual interrupter/dimmer wheel.

Optional Accessories

Code	Description
DELUX-TOP-38	Continuous bar top used on central sections when joining 3 or more bars. 38" long
DELUX-TOP-38-RGB	Continuous bar top with integrated 3d holographic lighting system, white + RGB, with remote control
DELUX-SHELF	Extra bottom shelf for additional storage in the DELUX portable bar, made in food grade #304 stainless steel

Architect Specs

The portable bar shall be a DELUX, manufactured in Montreal, Qc, Canada by BEST Portable Bars, a division of Avec Flair Bar Solutions Inc. It shall be entirely made of stainless steel. The bar top, front, sides, workspace shelf and speed rail shall be constructed of food grade #304 stainless steel. Top shall have 3 pre-set positions for left, center and right installation. The top, shelf, and bottle rack (speed rail) shall be removable and the bar frame shall be foldable. Disassembling and reassembling the bar shall be easy, with no tools required. Once disassembled, the bar shall allow for 70% of floor space storage, and shall be easy to carry in door frames, narrow halls and standard elevators. Black vinyl heavy duty protection pouches shall be included for safe handling of the bar frame and bar top. Shall be available with or without integrated double-layered water-free ice bin or sink. All models shall be available with optional 3d holographic RGBW LED lighting system controlled by means of a remote and a manually dimmable white LED workspace light, both integrated in the bar top.
